

# *OceanPeace - a Digital Wellbeing App*

---

*Mateusz Bis*

# Project overview

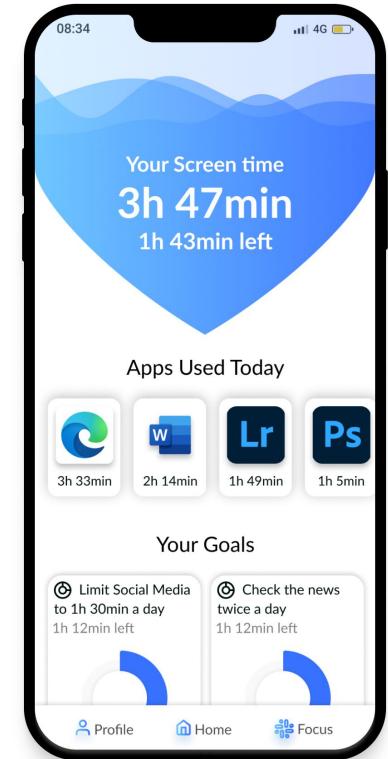

## The product:

The app is designed to help people find the golden mean in using their phone. It also has a companion responsive website as an advertisement.

## Project duration:

Dec 2021 - Feb - 2022

# *Project overview*

## *The problem:*

*With technology being so ubiquitous, many people, struggle to maintain common sense and spend too much time in front of various screens. Even though there are already many wellbeing apps, no one provide a real motivation to limit screen time and focus only on one platform: mobile.*

## *The goal:*

*Create an app and a companion website that will use friend rivalry and an achievement system to help people regain the control of their screen time, not only on their phone but also on every device they have.*

# *Project overview*

## *My role:*

*lead UX/UI designer and lead UX researcher*

## *Responsibilities:*

- Design Thinking research - emphasize, define, ideate,*
- conducting interviews, surveys, usability studies*
- creating wireframes and prototypes*

# *Understanding the user*

- *User research*
- *Personas*
- *Problem statements*
- *Competitive audit*
- *Ideation*

# *User research: summary*

*I used the Design Thinking scheme to emphasize with users, define their needs and ideate possible solutions. In the process I created:*

- Empathy map, personas based on 8 interviews with people how use their desktop more than 2 hours a day*
- user journeys, user stories & problem statements based on personas*
- ideated solutions with CrazyEights and Value proposition sticker board*

# Persona 1: Agnieszka Zalewska

## Problem statement:

Agnieszka IS A student on hybrid education studies WHO NEEDS TO find a efficient way to avoid distractions at school BECAUSE she wants to keep her grades up.

**Agnieszka Zalewska**

Age: 24

Occupation: student, remote, graphic designer

Location: Kraków

Interests: gaming, illustrations, art

Education: ongoing tertiary

### Bio

Agnieszka is an ambitious student in the third year of graphic design. After school, she works as an intern for a creative agency. Her work and studying mainly involve working on a computer thus she spends over 8 hours a day in front of a screen. In her surrounding, people use technology a similar amount of time, some also suffer from FOMO. She happens to get distracted herself, but thankfully she still manages to say "halt" to tech by taking regular breaks at work.

### Goals

- Spending time efficiently in front of the computer for work and studying purposes
- limit FOMO
- stop having problems with misusing tech in her free time

### Frustrations

- She finds it difficult to get to work, she sometimes watches YouTube videos before starting

### Personality

Introvert

Analytical

Busy

Messy

Independent

Extrovert

Creative

Time rich

Organized

Team player

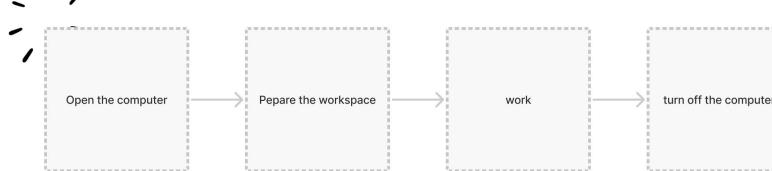

## The user journey of....

Agnieszka Zalewska

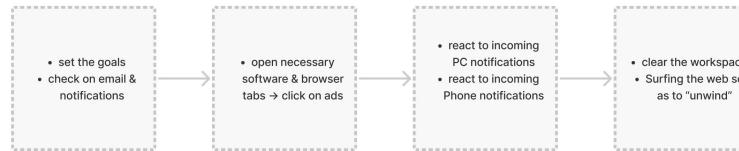

### User goal or problem

limit FOMO i distracting factors  
for the time of work

### User action

What actions are they currently taking? How are they doing it?  
What information are they seeking?

### Quotes and sentiment

How do they feel in this moment?

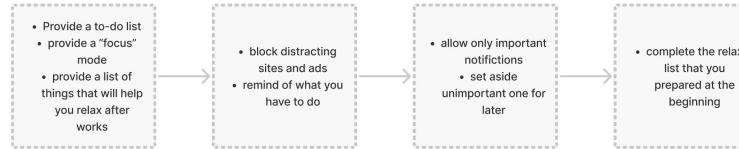

Drag one of these stickers or  
write a quote...

### Opportunity

What are some things that  
could improve this moment?  
Could this be skipped or solved  
elsewhere?

# Persona 1: Iza Górska

## Problem statement:

Izabela IS A law office manager WHO WANTS TO keep fit while at work BECAUSE she doesn't want to experience backache and other ailments related to sitting at a computer.

**Izabela Górska**

---

Age: 35  
Occupation: accountant  
Location: Kraków  
Interests: psychology, sport  
Education: master's degree in law

**Bio**

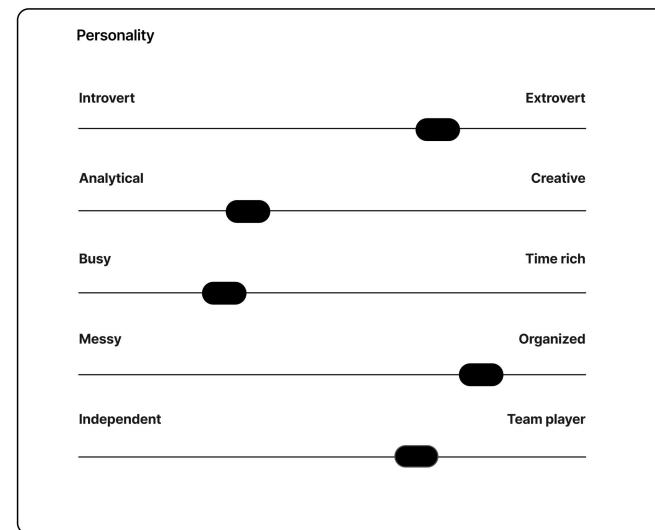

As the manager of a law office, Izabela ensures that her colleagues handle all the cases on schedule. On a daily basis, she assigns tasks, supervises the schedule and in high traffic time, she runs cases herself. It all involves a lot of screen time in front of a computer but she doesn't mind as she claims that this is a natural consequence of the technological advancement of humanity. Anyway, she likes to have a computer detox from time to time. She has happened to use digital wellbeing apps, which helped her gain persistence.

**Goals**

- take care of her health while long-standing use of computer
- occasionally cut off from technology

**Frustrations**

- some wellbeing apps that are said to help, only make things worse
- in stressful situations she reaches for electronics

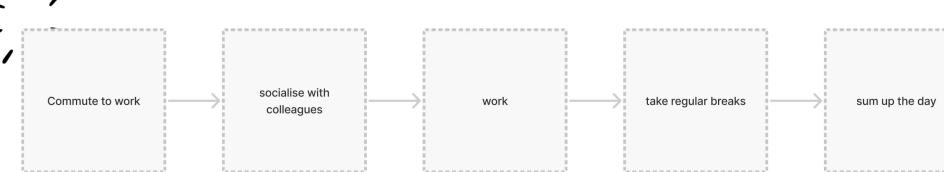

## The user journey of....

Iza Górska

### User goal or problem

sprawne zarządzanie w pracy,  
zapobieganie nadmierному  
korzystaniu z komputera w  
sytuacjach stresowych,

### User action

What actions are they currently  
taking? How are they doing it?  
What information are they  
seeking?

### Quotes and sentiment

How do they feel in this moment?

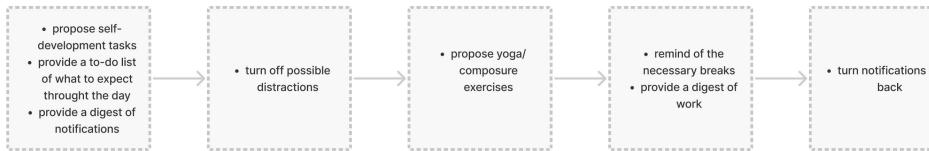

Drag one of these stickers or  
write a quote...

### Opportunity

What are some things that  
could improve this moment?  
Could this be skipped or solved  
elsewhere?

# Competitive audit

I compared and identified three types of competitors:

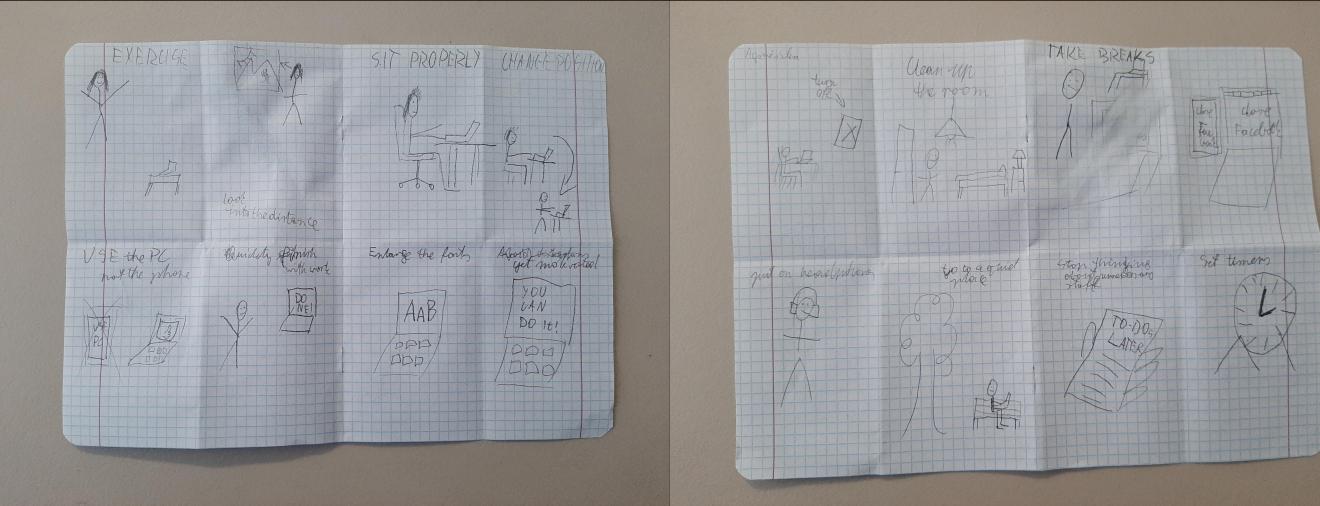

- Direct - digital wellbeing for desktop-only
- Direct - digital wellbeing for mobile-only
- Indirect - parental control

General information									
Competitor type	Type of Research	Supported devices	Product offering	Price	Website	Business size	Target audience	Unique value proposition	
Cold Turkey	direct	primary	PC	Block websites, games and applications to boost your productivity and reclaim your free time.	Free - \$20PLN za jeden	<a href="https://www.coldturkey.com">https://www.coldturkey.com</a>	medium	Windows users	Writer Artist Designer Breaks inspiring quotes
Freedom	direct	primary	PC Phones ChromeOS Web	Create blockers on your devices so you don't get distracted while working	Free Trial Subscription Licenses	<a href="https://freedomapp.org/licenses/">https://freedomapp.org/licenses/</a>	medium	People who want to focus on their work change a bad habit improve relationship with technology	Blocks distractions Soundtrack Focus devices locked mode - you can't escape Freedom
Focusee	direct	primary	PC Phones Web	Focusee is a fully-customizable and the "walk off" office application to increase personal efficiency and take countless hours of your back	\$8 - monthly \$35 - yearly \$35 - every 2 years	<a href="https://focusee.com/?utm_id=100">https://focusee.com/?utm_id=100</a>	medium	Focusee is the most powerful app ever created. also used to lock Focusee on their phone or computer	Remainder Timer Focus Mode - works almost like ransomware Block locations in windows explorer
Cloudy	indirect	primary	Windows Mac Android iOS	an app and website for time management at work. It measures how you spend time at the computer while working (e.g. social media, email, etc.)	Free, wypł. opł. za 5-75/mies	<a href="https://cloudyapp.net/time-tracking">https://cloudyapp.net/time-tracking</a>	small	Small IT business owners freelancers small projects	- hemispheric projective, reacquaints classical literary knowledge on diary project - didactic approach (3-4 yrs) / irony
Qustodio	indirect	secondary	Mac Windows iOS Android ChromeOS Kindle	a highly configurable, easy-to-manage parental control tool for keeping track of your child's activity	\$24.99* - 5 devices \$35.99* - 10 devices \$47.99* - 15 devices	<a href="https://www.qustodio.com/en">https://www.qustodio.com/en</a>	medium	Parents who care about their children's digital wellbeing	- such adjust limits to user age and maturity - tracking kid position - "parent" a device - download apps to user devices - custom profiles - eligible for schools
Norton Family	indirect	secondary	Windows Android iOS	Norton Family provides parents with the information they need to help keep their child safer and focused when online.	124 zł/mies.	<a href="https://nl.norton.com/norton-family">https://nl.norton.com/norton-family</a>	large	- rodzice którzy mają wiele dzieci - rodzice którzy chcą monitorować dziecięce czasu na komputerze - rodzice którzy mają małe dzieci	- Niedostępny w wersji - indywidualnej co kiedy działa ogańska na użytkownika, ale nie ma możliwości skorzystania z funkcji do pełnej powierzenia mac. dolegliwości. Portal endesa
Samsung Digital Wellbeing	indirect	primary	Android & One UI	digital wellbeing and parental control for Samsung phones	free	<a href="https://www.samsung.com/us/support/digital-wellbeing-and-parental-control/">https://www.samsung.com/us/support/digital-wellbeing-and-parental-control/</a>	large	użytkownicy telefonów Samsung które chcą limitować czas na telefon	- bedmode
Apple ScreenTime	indirect	secondary	iOS iPadOS	digital wellbeing and parental control for iPhone and iPad	free	<a href="https://support.apple.com/en-us/HT207905">https://support.apple.com/en-us/HT207905</a>	large	- rodzice, którzy mają wiele dzieci - rodzice, których dzieci nie lubią telefonów - rodzice, którzy chcą monitorować swoje dzieci	- rodzice, którzy mają wiele dzieci - rodzice, których dzieci nie lubią telefonów - rodzice, którzy chcą monitorować swoje dzieci
Forest: Stay focused	indirect	primary	Android iOS	an app helping users focus in a "Forest" style, with a Typewriter theme. the goal is to grow a forest by not using the phone. before each session the user chooses how long to grow their tree. the more time spent not using their phone during the set time, a tree in their forest will grow.	Freesium - darmowe aktywności edukacyjne Forest - darmowe aplikacje do nauki angielskiego i francuskiego	<a href="https://www.forestapp.org/">https://www.forestapp.org/</a> <a href="https://www.forestapp.org/en/">https://www.forestapp.org/en/</a>	medium	Ludzie, którzy chcą być rozwijani w programie i obserwują swoje	- unikając modyfikowania laju projektu - możliwości porównywania laju projektu z innym - zmiany laju projektu
Intelx: Create a better you	indirect	primary	Android iOS	Instagram-like stories with the aim of enhancing the user's self-esteem and well-being. users can express their fears and individual users achieve certain goals (e.g. become more productive)	Darmowe czarnek rozwijający się firm	<a href="https://intelx.app/en/">https://intelx.app/en/</a> <a href="https://intelx.app/zh/">https://intelx.app/zh/</a>	medium	- Firmy które chcą mienić się lepszymi - ludzie, którzy chcą zapewnić sobie satysfakcję z życia	- nowy typ Instagram Story - nowe i formate audio - programowe przed psychologiem

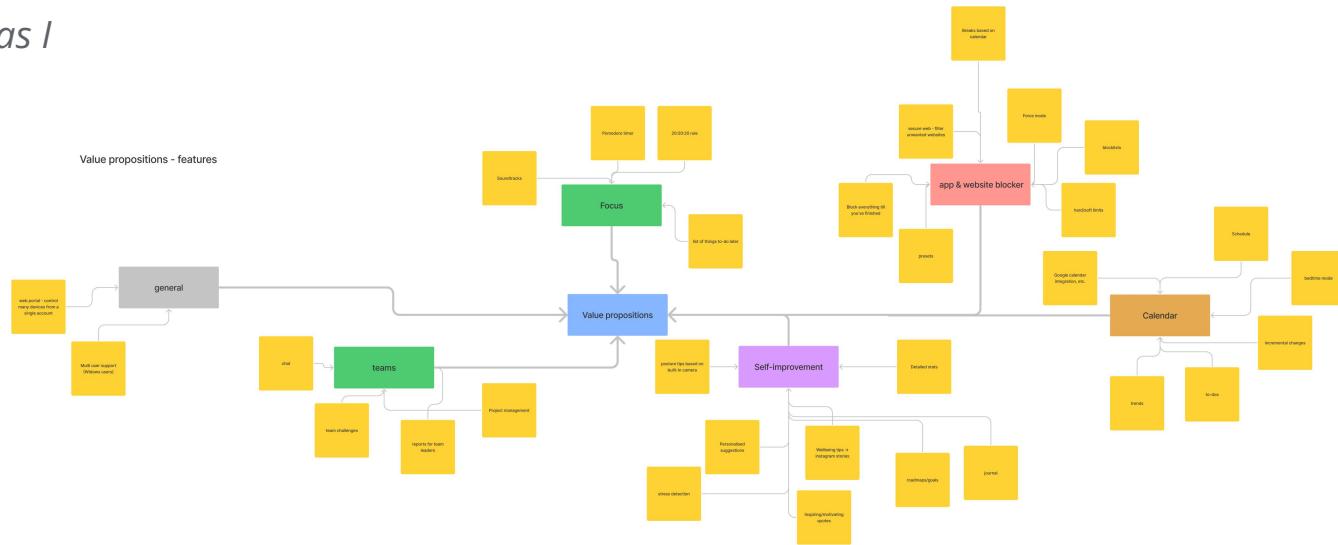

[link to the spreadsheet](#)

# Ideation

To come up with more ideas I went for Craze Eights, whereas to sum up all the ideas I created a value proposition white board.

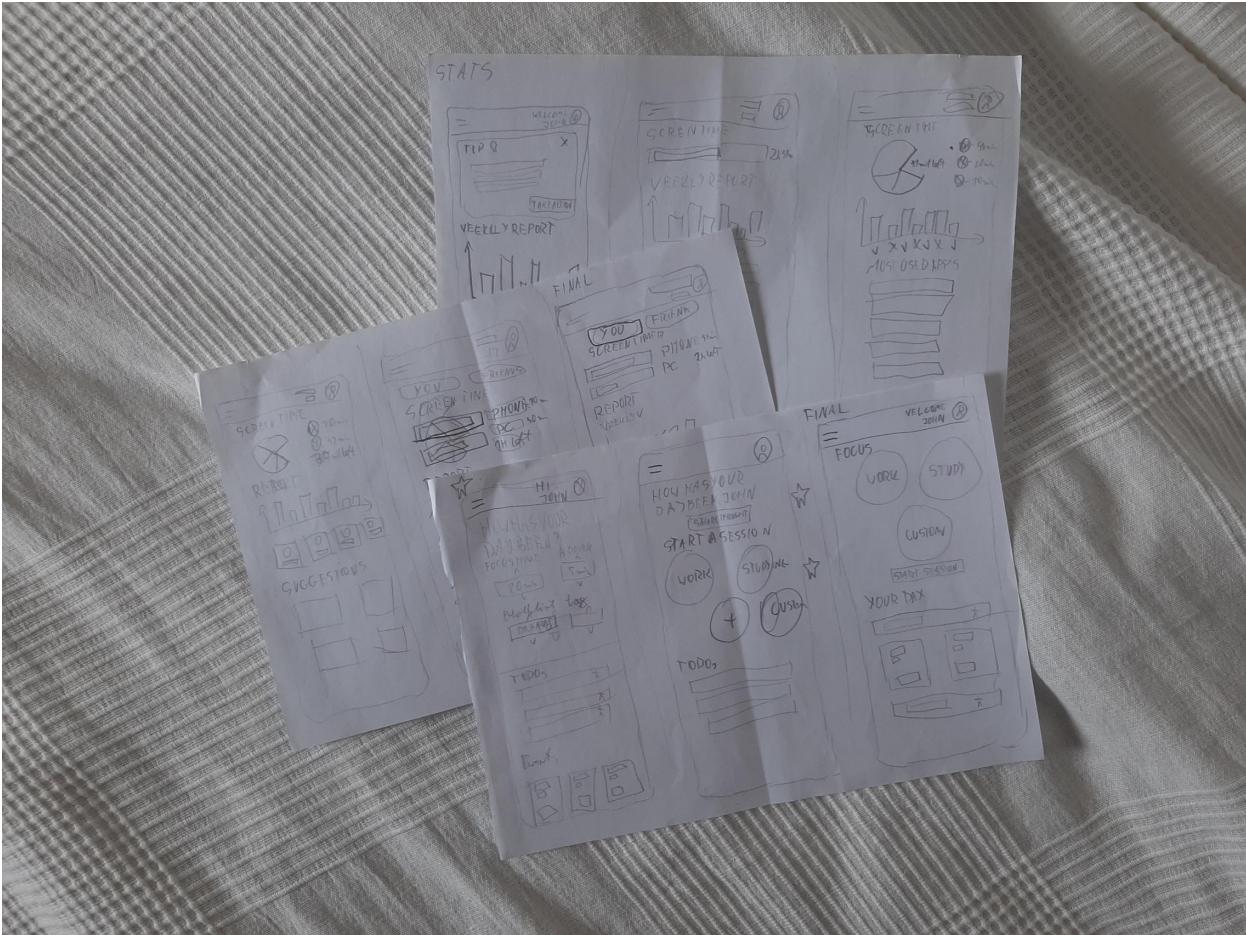

## *Starting the design*

- *Paper wireframes*
- *Digital wireframes*
- *Low-fidelity prototype*
- *Usability studies*

# Paper wireframes

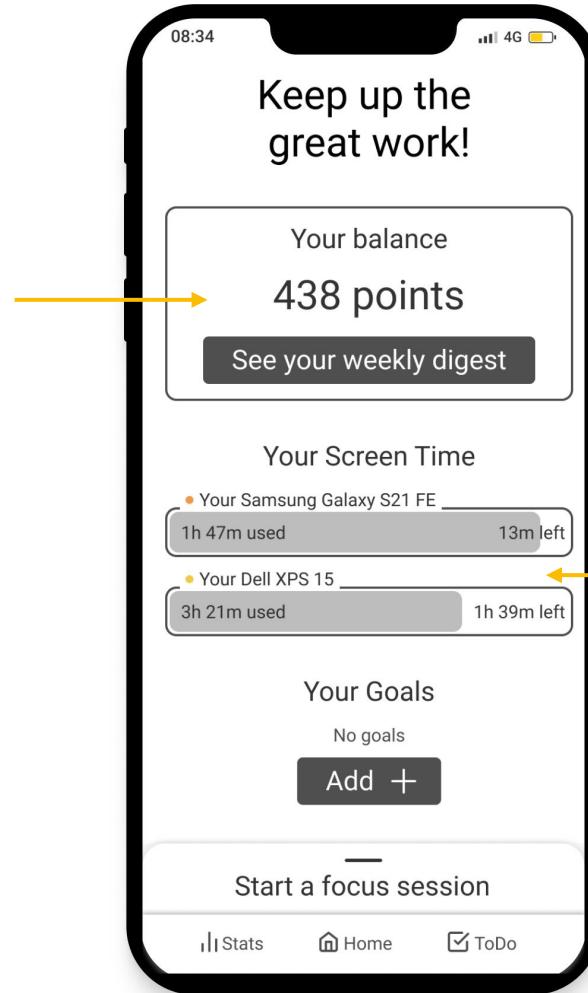

I love starting with paper, as my mind is usually full of ideas and pencil is the easiest way to realize them before they slip my mind.

# Digital wireframes

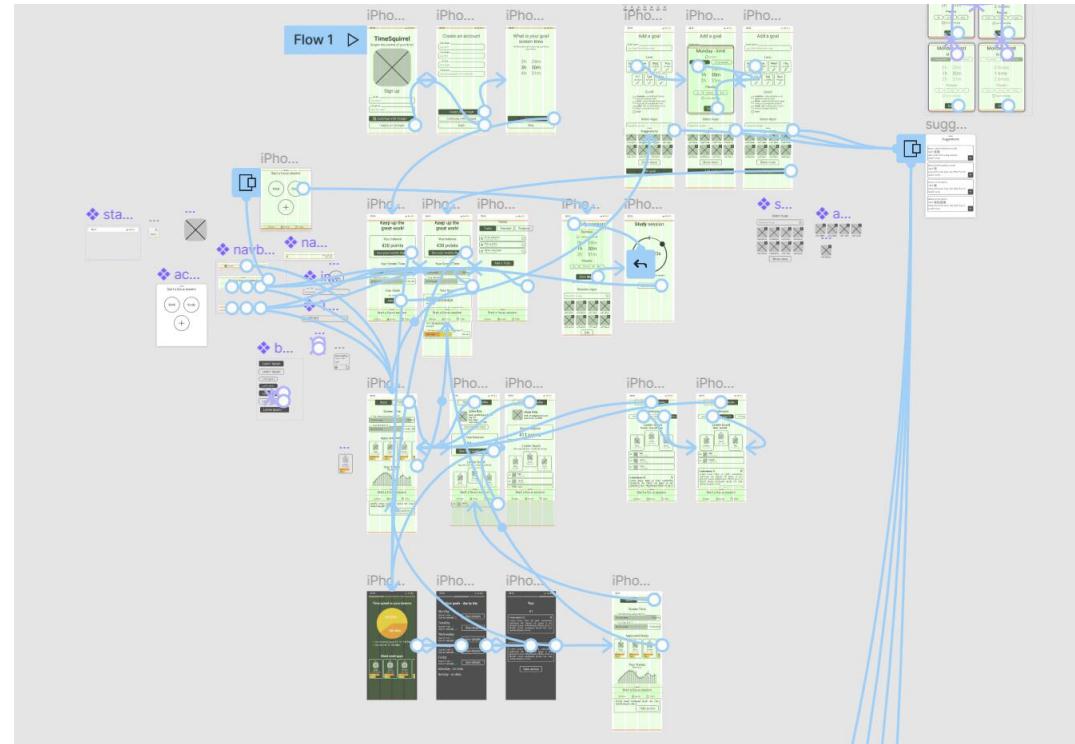

Having a paper wireframes at hand made creating the digital counterparts much easier.  
Of course the process wasn't free of problems - some elements that looked good on paper didn't shine on the screen.  
I had to work that out but it only added to the joy!

*Collect points for focus sessions so as to later compete with friends*

# *Low-fidelity prototype*

<https://www.figma.com/file/NmkglOyOBEA4yf2yLrS9wA/Wellbeing---prototypes?node-id=0%3A1>

# *Usability study: parameters*

*Study type:*

*Unmoderated usability study on maze.co*

*Location:*

*Poland, remote*

*Participants:*

*7 participants*

*Length:*

*15-25 minutes*

# *Usability study: findings*

*Insert a one to two sentence introduction to the findings shared below.*

P0

*Finding*

*the difference between the digest and goals is not explicit enough - goals, a core functionality is difficult to use*

P1

*Finding*

*the focus session overlay is not clear to users*

P2

*Finding*

*users expect to see all the content above the fold - some elements require scrolling*

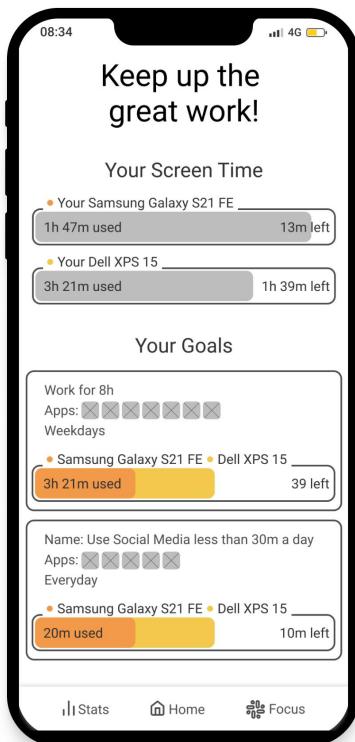

## *Refining the design*

- *Mockups*
- *High-fidelity prototype*
- *Accessibility*

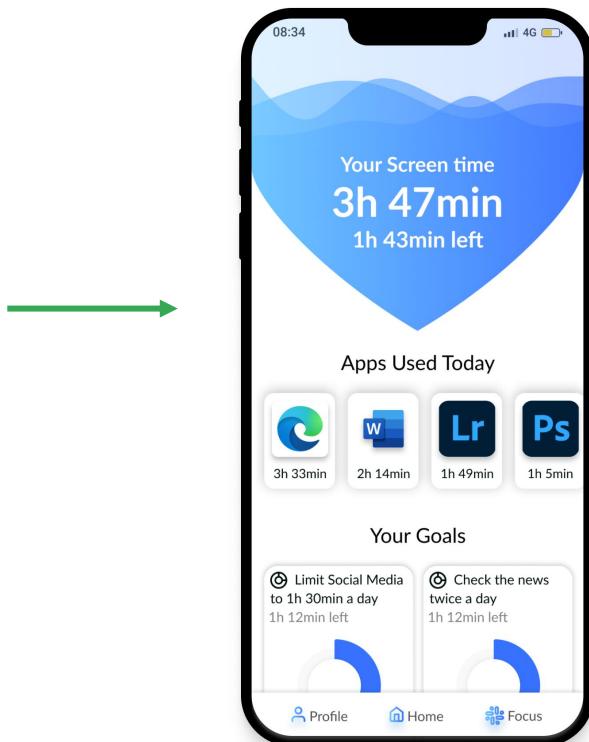

# Mockups

I tried to use creative shapes like waves and fins to distinguish the design from the “ocean” of other apps.

Lo-Fi wireframe

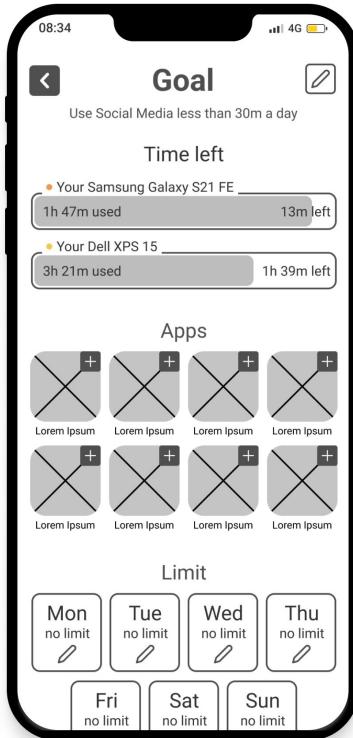

Hi-Fi mockup

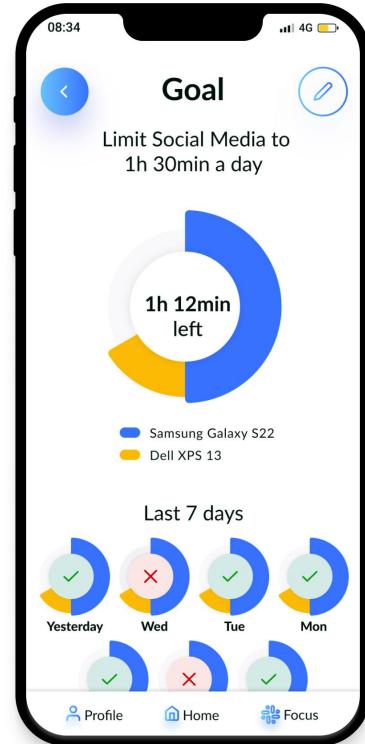

# Mockups

I knew that stats are important. The users want to see their successes and the stats help them take it in

Lo-Fi wireframe

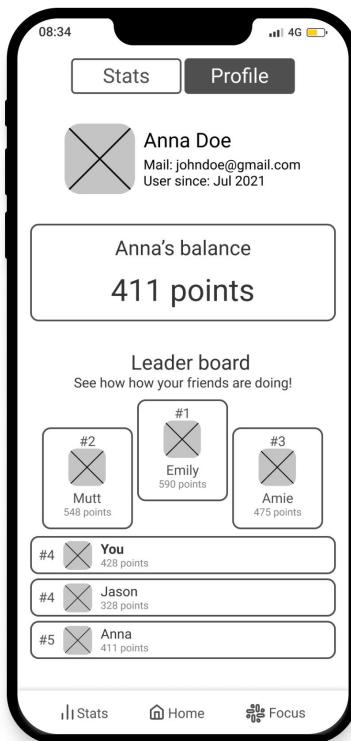

Hi-Fi mockup

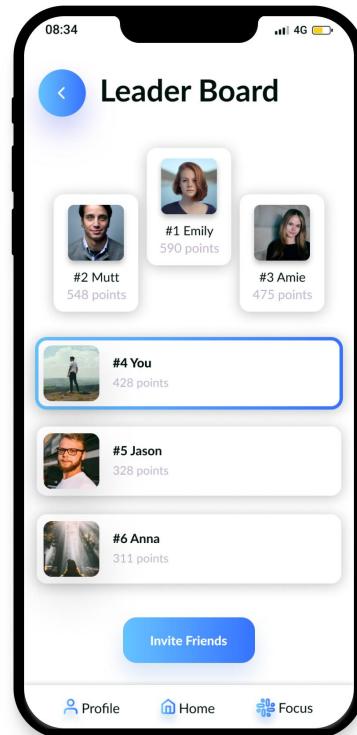

# Mockups

*There is nothing better than  
being motived by the ones  
you like or love.*

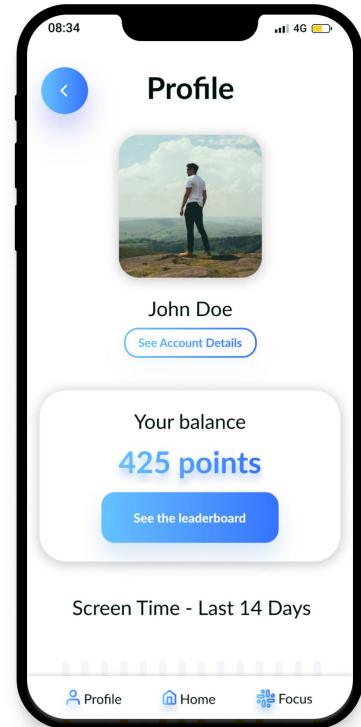

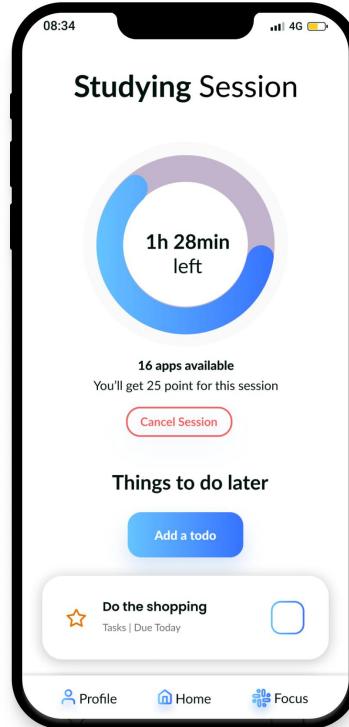

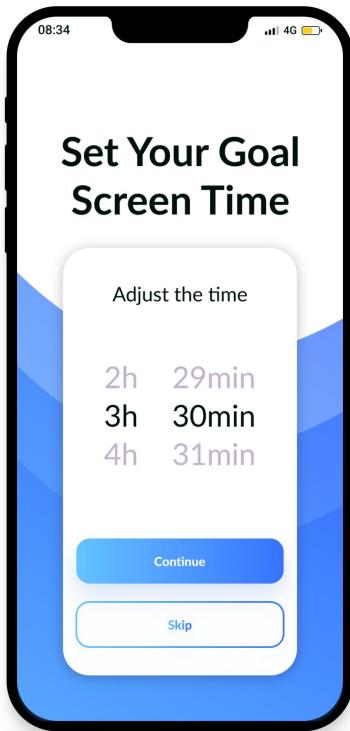

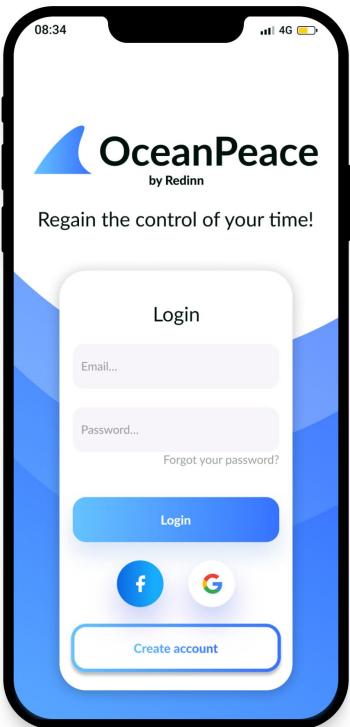

Lo-Fi wireframe

Hi-Fi mockup

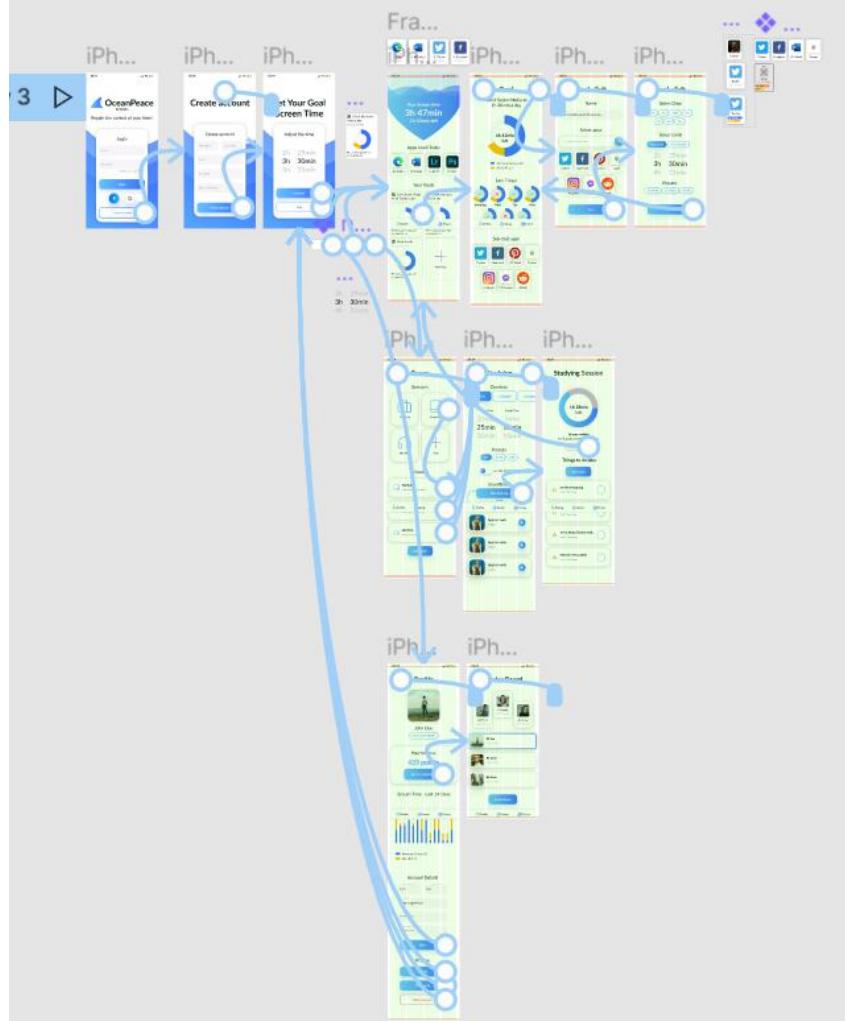

# Mockups

# *High-fidelity prototype*

<https://www.figma.com/file/NmkglOyOBEA4yf2yLrS9wA/Wellbeing---prototypes?node-id=0%3A1>

# *Accessibility considerations*

1

*The blue background  
passes the WCAG AA test*

2

*Support page - users can  
visit the companion website  
if they need any help  
related to the app  
experience or digital  
wellbeing in general*

3

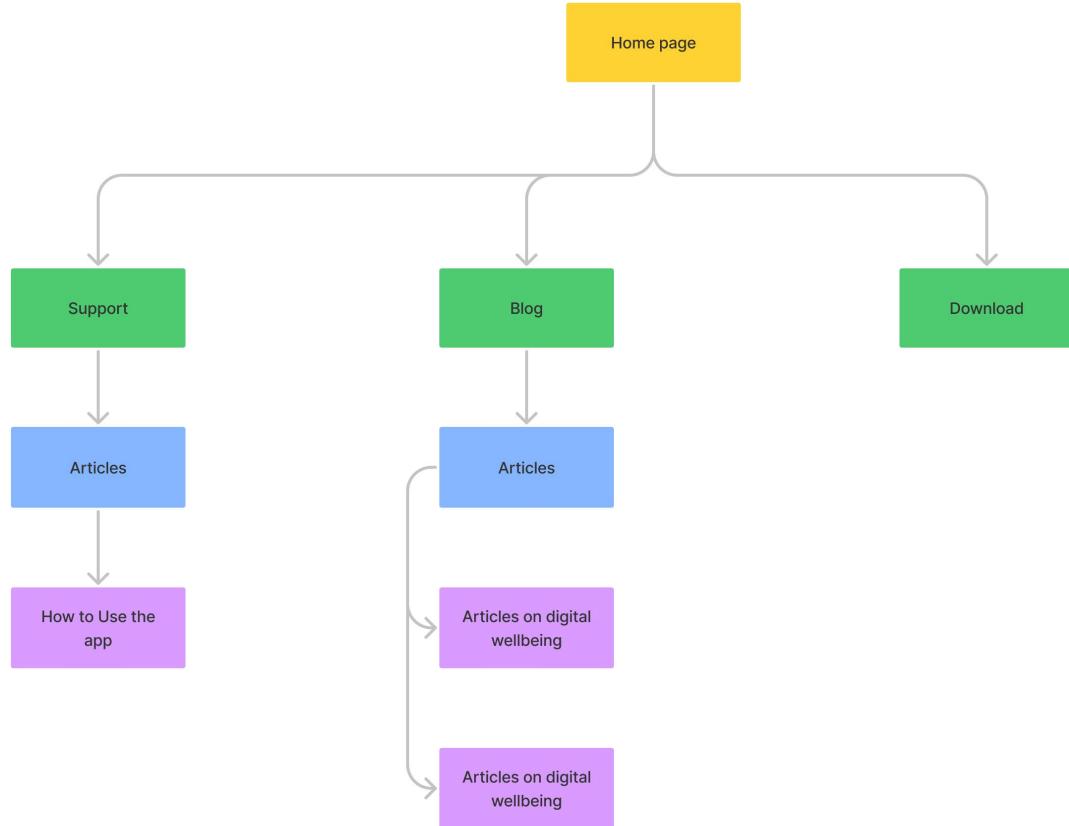

*Large CTA's ensure that  
users make no misclicks*

# *Responsive Design*

- *Information architecture*
- *Responsive design*

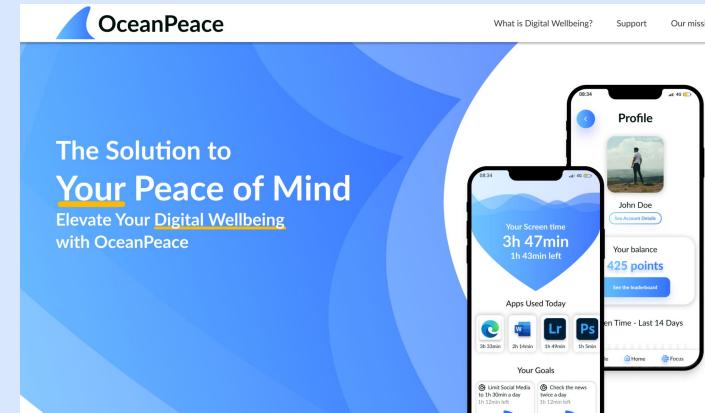

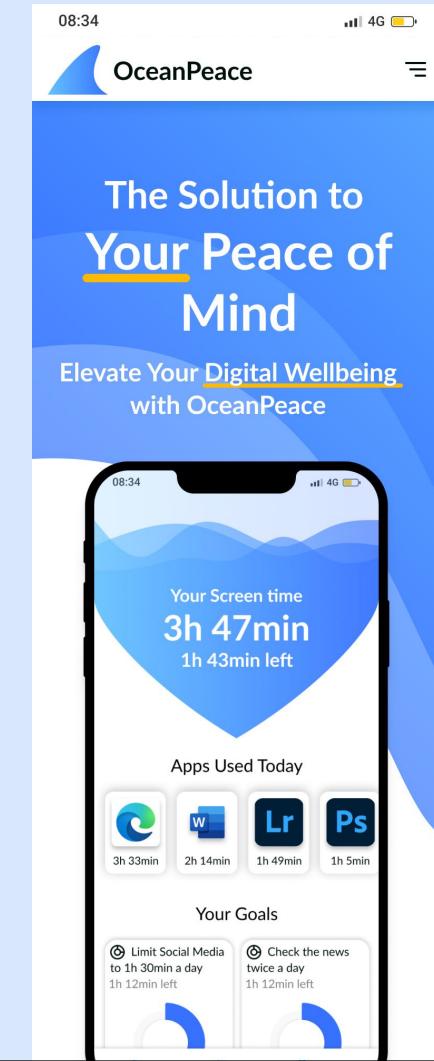

# Sitemap

*I tried to make the website as simple as possible to so it smoothly complements the app.*

# Responsive designs

To keep up the momentum I tried to utilise the fin shape to make the design more playful and interesting

Focus on the job.  
We'll do the rest!

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Mauris vel neque in orci placerat cursus. Pellentesque efficitur id nisl ut blandit. Donec vestibulum iaculis nisi. Cras laoreet aliquam rutrum.

Reviews Speak for Themselves

## *Going forward*

- *Takeaways*
- *Next steps*

# *Takeaways*

## *Impact:*

*"I think it is quite straightforward and well designed. Great work!"*

## *What I learned:*

- I- the Design Thinking methodology*
- creating mockups, wireframes & prototypes*
- practising creating responsive websites*

# *Next steps*

1

*Hand off the designs to the engineers*

2

*Measure KPIs and collect user reviews*

3

*Create version of the app for other platforms: Smart TV, Desktops*

# *Let's connect!*
